03 PERSONAL PROJECTS

Nov 2022

Portfolio Site

Personal portfolio website using React, TailwindCSS, and Vite. This website displayed my personal projects, some details about me, and my contact form. All links to the project sites or repositories including links to my Github and LinkedIn profiles are provided.

Oct 2022 — Nov 2022

Best Buy Clone

Clone of Best Buy's Website using their API. The user is able to browse products from many departments and add or remove them when needed. Product data is displayed via the Best Buy API and users can checkout their items when finished shopping.

Aug 2022 — Oct 2022

Crypto Tracker

Cryptocurrency tracking CRUD app . Users are able to search through pages of cryptocurrencies with the data provided by the Coingecko API. If a user wants to track their portfolio, transactions can be added to help users better visualize how their portfolio is performing.

Jun 2022 — Jul 2022

Product Landing Page

With an upcoming keyboard's group buy about to open, I decided to create a product landing page for the keyboard. The website has a navigation, hero section, product details section, newsletter signup, and footer.
